Burpee's Hybrid Tomatoes

ALL CREATED ON BURPEE'S FORDHOOK FARMS

Unsurpassed for quality, uniformity and yield. Every seed from a hand pollinated fruit.

6123 Burpee's Big Boy Giant Hybrid

78 days—Largest of our true first-generation (F₁) hybrids, at its peak of production in midseason when many standard varieties decline in yield and size of fruit. Unlike other large varieties, Big Boy Tomatoes are perfectly smooth, deep globe to deep oblate in shape, very firm, extra large, average 10 ozs., some weigh 1 lb. or more. Scarlet-red skin, thick walls, bright red, meaty flesh of fine flavor and excellent quality. Plants are large, extremely vigorous and heavy producers. Readily salable in market and roadside stands.

1/8 oz. \$6.00; 1/4 oz. \$10.00; 1/2 oz. \$18.00;
oz. \$35.00; 1/4 lb. \$110.00; lb. \$325.00

6125a Burpeeana Early Hybrid

58 days—Distinctly different extra early, true, first-generation (F₁) hybrid tomato created at Burpee's Fordhook Farms, to offset the usual shortcomings of many of the open-pollinated early varieties. Fruits of Burpeeana Early are of an attractive, deep globular shape, medium size, smooth, firm, rich scarlet, average 5 ozs. in weight, and borne profusely in clusters of from 5 to 8. Quality is excellent; flavor is mild. Plants are of spreading habit, prolific and decidedly so if high fertility and moisture are maintained in the soil. Profitable for early market. Burpeeana Early is also well adapted for greenhouse growing. It is an excellent shipping tomato.

1/8 oz. \$3.50; 1/4 oz. \$6.00;
1/2 oz. \$11.00; oz. \$20.00; 1/4 lb. \$70.00;

6113a Burpee Hybrid

Fruits are medium to large, average 8 ozs. in weight, deep globular in shape, smooth, scarlet-red, flesh meaty, firm; cell walls very thick, of outstanding quality and rich flavor.

1/8 oz. \$3.50; 1/4 oz. \$6.00;
1/2 oz. \$11.00; oz. \$20.00; 1/4 lb. \$70.00;

6135 Fordhook Hybrid

60 days—An early, highly productive, long-bearing, true first-generation (F₁) hybrid, noted for its big yield and uniformly shaped, smooth fruits of medium size, average 6 ozs., clear bright red, oblate to globular in shape, and borne in large clusters.

1/8 oz. \$3.50; 1/4 oz. \$6.00;

Burpee Hybrid Cucumber

ORIGINATED ON BURPEE'S FORDHOOK FARMS

6023 Burpee Hybrid 60 days. High resistance to mosaic and downy mildew are the outstanding attributes of this true first generation (F₁) hybrid white spine, slicing type cucumber. Vines are extremely vigorous, long lived and bear an abundance of well-formed green fruits of handsome appearance, 8 in. and more long, 2½ in. wide, square at both ends with medium seed cavity and crispy, white flesh of excellent quality. Burpee Hybrid Cucumber out-yields open-pollinated varieties because the vines continue to produce their fruits most profusely for a long time after the others have ceased. Gardeners everywhere write us of the wonderful results they are having with this cucumber. Burpee Hybrid Cucumber has proved to be exceptionally well adapted to greenhouse growing, and is the leading variety of glass-house growers in the hothouse sections of the country. Its unusually high yields under glass make Burpee Hybrid Cucumber a profitable variety to grow when the market demands a quality cucumber at high prices. Introduced by us in 1945.

½ oz. \$2.20; oz. \$4.25; ¼ lb. \$12.75; lb. \$35.00;
2 to 9 lbs. @ \$34.00 per lb.; 10 lbs. or more @ \$33.00 per lb.

Baskets of Burpee Hybrid Cucumber produced by the Sterling Hydroponic Farms, Miami, Florida. The cucumbers in the picture are part of a yield of over 300 bushels produced from 4 ozs. of seed. Bulk of fruit graded U. S. No. 1 with a very small amount of choice and a very low percentage of culls.

Stringless Black Valentine Bush Beans

NEW MULTIFLORA SWEET PEAS

As the name indicates, the outstanding characteristic of this new class of sweet peas, which distinguishes them from other varieties, is that more flowers are borne to a stem when plants are well grown. Flowers are of medium size, stems are remarkably long and strong. The number of blooms to a stem seems to vary with the color—fives and sixes are common, sevens and more are often seen. Many of the flowers are strikingly waved. In color they range from pure white through shades of pink and rose, orange-cerise, lavender, etc. Plants are vigorous, free blooming, rather early; flowers are wonderful for cutting.

BURPEE'S NEW GIANT

Created on Burpee's Floradale Seed Farms

heat resistant SWEET PEAS

Tested over a period of years under the hot weather conditions experienced at Burpee's Fordhook Farms near Philadelphia

Burpee's New Giant Heat Resistant Sweet Peas

The picture at the left was taken of Burpee's Giant Heat Resistant Sweet Peas growing at Fordhook July 24, 1953. These seeds were planted on the same day and received exactly the same care and cultivation as the Giant Spencers, the Earlies and the Cuthbertsons. When this picture was taken the Burpee Giant Heat Resistant varieties were blooming profusely while the other varieties had long since ceased to flower.

In the spring, there was an unusual amount of rain, followed by a dry spell with thermometer readings for many days in the nineties. Sweet Peas that can survive such unfavorable conditions and continue to produce large, long-stemmed flowers in profusion through July and into August must be good. Burpee Giant Heat Resistant did just that.

3605 Blue Sky Beautiful light silvery blue; charming shade.

3606 Blue Velvet Waved and duplexed, deep blue blooms.

3607 Flash Bright scarlet suffused orange; dazzling, brilliant.

3602 All Colors Mixed

Sweet Pea testing grounds, Burpee's Floradale Seed Farms, California. The Early Flowering varieties at the peak of bloom

Early Flowering SWEET PEAS

Burpee's Early Flowering Sweet Peas come into bloom outdoors before the summer heat arrives—usually 3 to 4 weeks earlier than the Burpee Giant varieties. They are valuable for winter flowering under glass, also especially adapted for growing in frost-free sections and for earliest blooms outdoors in the North. Sweet Peas do best in cool weather. If seed was not sown in the fall, sow as early in the spring as the ground can be prepared. All types of sweet peas prefer an open, sunny location, and deep, rich soil which must be well drained.

CUTHBERTSON SWEET PEAS

Heat-Resistant, Spring Flowering

Come into bloom, outdoors, about 10 days before the Giants and remain in bloom the same length of time. Plants are quite vigorous and produce a heavy crop of large, long-stemmed blooms. Heat-resistant and therefore especially adapted to localities where sweet peas have heretofore been more or less unsuccessful. Under glass they are unusually free flowering and prolong the spring cutting season.

Bird's Vita Plant Bands

(Sold in Case Lots only)

Bird's vita plant bands are designed to grow your plants inside while danger of frost is outside. Band fits standard size flats. Roots are not disturbed when transplanted out in open from bands, thus no shock or setback to plant. Bands are treated with nutrients to assure vigorous well-balanced growth. **Vita Band No. 10** is used for short growing periods. Will usually contain root growth up to approximately 8 to 10 weeks. **Vita Band D** contains root growth until grower chooses to let root through band. Only quick, slight pressure is needed to crack band. Do not remove Vita Band D when transplanting. Band disintegrates in the soil. **Vita Band H** is the new nutrient-treated band which will control root growth of those plants which demand extra long growing periods.
